PRINCIPAL'S MESSAGE

Let me take this opportunity to examine some of the qualities which have impressed me at Victoria Composite High School.

Firstly, our fine teaching staff and facilities have made possible an academic setting second to none. Secondly, our well equipped physical plant has made possible a myriad of benefits for students interested in a trade or technical field.

Thirdly, the most important component is the student body at Victoria Composite High School. Our society rules that certain standards of behaviour are accepted by educated people, and that good conduct is an essential part of our existence. We have, therefore, established among our students standards of manners, truth and self discipline.

The challenge of learning, the routine of homework, and the strain of examinations are necessary requirements for the achievements of educational goals, and it is to those who fully use their abilities that the rewards of this world are accorded.

It is especially important that the qualities of friendliness and individualism are not lost in the pursuit of efficiency in a large school. We have therefore provided many activities, clubs and services for students in order that they do not become lost or forgotten in the every day operation of our school. This I firmly believe is the essence of school spirit at Victoria Composite High School.

I am extremely proud that our students and staff excel in qualities I have listed above.

Robert W. Dean
